

GET YOUR PREGNANCY VACCINATIONS

Get your whooping cough (16+ weeks) vaccine.

It's important to have your whooping cough vaccine between 16 and 32 weeks pregnant, to make sure that your baby is fully protected from this serious illness when they are born.

Pop into our drop in clinic at Broomfield Hospital Maternity Department.

Tuesdays & Wednesdays, 9am - 5pm.

No appointment necessary.

For more information speak to your midwife, one of our immunisation nurses or call 0300 790 0597.
